

Broadcasters never know when or where news will break, so having reliable power in the field that lasts as long as the story does is essential.

## Get your shot. Every time.

Jadoo manufactures the most dependable, easy-to-use fuel cell power solution on the market. Benefits of fuel cells for broadcasters include:

**LONG, CONTINUOUS RUNTIME**

**PREDICTABLE POWER, ANYTIME**

**RAPID REFILL**

**EASY TO USE**

**more power. more possibilities.**

## Fuel Cell Power Unit

Easy to use “engine” for generating high-density energy. Results are consistent and reliable runtime, accurate state-of-fill display, and no “recharge memory.”

### NAB II™ or N-Gen™

Weight: 5.1 lb (excludes N-Stor)  
Size: 4.3 (w) x 4.3 (d) x 7.4 (h) in  
Output: 12 VDC Nominal  
Wattage: 100 W Continuous  
Operating Range: 35-100°F, 10-100% RH

## N-Stor™ Fuel Canisters

Provides the fuel necessary for generating electricity when used with the Fuel Cell Power Unit.

### N-Stor130

Capacity: 130 W-h  
Weight: 2 lb  
Size: 2.5 (dia) x 4.5 (h) in

### N-Stor360

Capacity: 360 W-h  
Weight: 5.1 lb  
Size: 2.5 (dia) x 10.5 (h) in

## Refill Stations

Convenient to use solutions for refilling the N-Stor Fuel Canisters.

### FillPoint™

Multi-port, high-performance refill station designed specifically for high-volume enterprise user groups. Refills four N-Stor130 Fuel Canisters simultaneously in less than one hour.

### FillOne™

Portable, single-port refill station for mobile or independent users. Can be powered directly by a 12 VDC power source.

## Cables and Accessories

### PowerBase™

Sleek support stand for using the Fuel Cell Power Unit on a desk or work bench.

### Auto-adapter and XLR Power Cables

Provide power connections to a variety of broadcast, first responder and portable office applications equipment.
